Amanda Thompson Receives LEED Certification

Fairfax, Virginia – Amanda Thompson, Environmental Scientist, has earned the Leadership in Energy and Environmental Design (LEED) Accredited Professional certification.

This professional certificate recognizes individuals with an extensive knowledge of green building practices and principles for the design, construction and operation of high-performance green buildings.

“I am proud of Amanda’s achievement in earning LEED certification,” said Dr. Kirby, Director of Environmental Services. “We encourage all of our employees to expand their capabilities and become lifelong learners. This certificate demonstrates Amanda’s knowledge and commitment to green building, as well as the firm’s goal to further promote the importance of sustainable design and stay on the forefront of the wave of green infrastructure”.

More and more clients are now increasingly mandating participation of a LEED Accredited Professional in their projects. This in-house expertise strengthens our qualifications in pursuing federal, state and local municipal projects requiring LEED accredited professionals.

As an environmental scientist, Ms. Thompson’s responsibilities include Phase I Environmental Site Assessments, NEPA documentation, VSMP permitting with Stormwater Pollution Prevention Plans and asbestos and lead paint sampling for a variety of public and private clients. She is a graduate of Lake Superior State University. She is a member of the Northern Virginia Building Industry Associations’ Environmental Committee and Green Building Committee.

With offices in Fairfax and Leesburg, Virginia, Paciulli, Simmons & Associates is a multi-discipline engineering firm specializing in civil engineering, land surveying, landscape architecture, land planning, environmental, wetland, and archaeological services. The firm provides a wide array of services to government agencies, land developers, and educational institutions throughout the Mid- Atlantic Region. Established in 1744, Paciulli, Simmons and Associates has been recognized as the oldest firm in the Washington Metropolitan area.
