Fairfax, Virginia — In a ceremony held January 20, 2006, Fairfax County presented Paciulli, Simmons & Associates with a 2005 Land Conservation Award as “Outstanding Engineering Firm” for our work on the \$6 million Lake Fairfax Park Improvement project, for the Fairfax County Park Authority. The Land Conservation Awards honor developers, designers, site superintendents and contractors whose projects best demonstrate excellence in erosion and sediment control design and implementation or a commitment to tree preservation and replacement in Fairfax County.

Project Manager, Tod Kolankiewicz remarks, “The success of this project is attributable to the quality work performed by all of the firm’s departments from design through construction, in conjunction with a highly involved Owner, Architect, and General Contractor. Our long-standing client relationships with the project team provided the proper chemistry to construct a successful project in a highly visible and sensitive environment.”

The firm is currently working on Lake Fairfax Park Core Facility Improvements Phase 2 and 2A as a subconsultant to Studio 3 Architects. The scope of work for the design of phase I improvements include surveying, environmental studies, and preparing a minor site plan showing construction of fishing and boating docks, pedestrian ramps and walkways, and other recreational facilities.

With offices in Fairfax and Leesburg, Virginia, Paciulli, Simmons & Associates is a multi-discipline engineering firm specializing in civil engineering, land surveying, landscape architecture, land planning, and environmental and wetland services. The firm provides a wide array of services to government agencies, land developers, and educational institutions throughout the Mid- Atlantic Region. Established in 1744, Paciulli, Simmons and Associates has been recognized as the oldest firm in the Washington Metropolitan area.
