

Girl's Probation House a Win for PSA!

Paciulli, Simmons & Associates was recently awarded the civil engineering work for the Girls Probation House as a subconsultant to Cole and Denny, a full-service architectural, planning and interior design firm.

This new girl's probation house, a Fairfax County project, will be approximately 11,500 square feet and include staff offices, classrooms, meeting/multipurpose rooms, recreation, and housing facilities for up to 12 residents. The project will also include parking, outdoor recreation, and associated site work. The project will have a goal of silver certification under the LEED Green Building program.

Paciulli, Simmons & Associates had already conducted a feasibility study for the proposed girls probation house last year.
