## Michael DeRosier, AICP, LA Certified LEED AP Neighborhood Development

*Becoming only the eighth person in Virginia to hold this designation*

Fairfax, VA - Paciulli, Simmons & Associates is pleased to announce that Michael DeRosier, AICP, LA has earned the credential of LEED AP Neighborhood Development. As one of only eight professionals in the Commonwealth of Virginia to receive this designation, he possesses specialized knowledge of green building principles and a strong commitment to green building design, construction and operations in the development of environmentally responsible communities.

The LEED for AP Neighborhood Development rating system is the first national system to integrate the principles of smart growth, urbanism, and green infrastructure and building to assess and reward green development practices. "Unlike other LEED rating systems, which focus primarily on green building practices, LEED for Neighborhood Development places emphasis on the site selection, design, and construction elements that bring buildings and infrastructure together into a neighborhood and relate the neighborhood to its landscape as well as its local and regional context."

DeRosier serves as Director of Environmental, Sustainability and Planning for Paciulli, Simmons & Associates with more than 22 years of project management and technical design expertise in planning, landscape architecture, civil engineering, and urban design.

DeRosier is a graduate of Michigan State University with a Bachelor of Arts in Landscape Architecture. He is a member of the National Association of Environmental Professionals, American Planning Association, American Institute of Certified Planners, International Society of Arboriculture, and the Project Management Institute.

Established in 1744, Paciulli, Simmons & Associates is a multi-disciplinary consulting engineering firm providing superior expertise in civil engineering, land planning, land surveying, landscape architecture, environmental and wetland science, archaeology and architectural history, and sustainable design services. The firm's project experience includes serving public agencies and private sector companies in design/build, mixed-use, residential, state and local government, federal/military, educational, parks and recreation, redevelopment/urban planning, transportation, utilities, commercial, and sustainable design projects.
